The image shows a Windows desktop with three main windows:

- YouTube Premium Video:** Playing a video titled "Plataformas 2D Unity" by LuisCanary.
- Code Editor:** Visual Studio Code showing C# scripts for a 2D game. The files include `PlayerMove.cs`, `ChangeDoorSkins.cs`, `AllBees.cs`, `PlayerOpen.cs`, and `PlayerMovement.cs`. The `PlayerMovement.cs` script contains logic for moving between waypoints and handling spikes.
- Unity Editor:** The Unity interface for the same project. The Project window shows assets like Main Camera, Canvas, and various prefabs. The Inspector window shows a BeeSprite object with components like Transform, Sprite Renderer, Animator, Box Collider 2D, and a custom script named Bee. The Bee script has properties for Speed (0.5) and Move Spots (containing two waypoints). The Scene view shows a 2D level with platforms and enemies.
